overview.

make me furniture supply hand crafted domestic class library and mezzanine platform ladders perfectly suited to home interiors. We have a range of options to help you pick and choose what suits your living space, you can also choose practically any timber for your ladder as long as it falls within our sustainability ethos.

Utilising high grade timbers to create a European Oak ladder or american black walnut to create a rolling ladder on a rail system, our bespoke ladders can become an addition to your contemporary living space. We can also supply more traditional designed ladders with elements such as over size treads and wrought iron handrails for more traditionally styled interiors.

In addition to modern oak library ladders we can make foldaway step stools for reaching high up storage areas within your home – all our ladders are supplied fully assembled, handrails and/or rear rests are simply fixed using the bolt/s provided.

choose your style.

f-II-01 upright.

Library ladder with block rests to rear of main rail 45 x 55mm as standard, can be tailored to any size request..

choose your treads.

standard.

390mm x 75mm x 28mm

paddle.

390mm x 140mm x 28mm

a bit about our treads.

make me furniture supply two styles of library ladder treads as standard, our bespoke design service means that you can have a ladder made in any dimensions or style you require – the two treads as shown are in what we'd call our most 'popular' tread dimensions.

Your tread timber doesn't necessarily have to match the upright timber chosen – see our timber page on the PDF or our samples page on the website for more information.

* measurements are just a guide

choose your grips.

standard.

Tread finished in satin Danish oil stain (other stains available upon request).

silicone strips.

Silicone bead set in routed channel on top side of tread.

melamine.

1.5mm thick coloured melamine layer applied to timber tread, satin and gloss finishes also available

our grips.

make me furniture supply 3 different types of tread grip finishes as standard, these include:

Standard tread grip

We finish our ladder range with a satin finish Danish Oil as standard to give a soft sheen to the timber and bring out the grain.

Silicone strip tread grip

Silicone bead strips give the top face of the tread a more gripping surface under foot, suited for environments where moisture may be an issue such as in a bathroom or kitchen. Also well suited for access to mezzanine levels via a ladder where you may step on and step off the ladder.

Melamine tread grip

Use melamine to add an accent colour to your interior space. We apply the melamine to the top surface of the tread to work with the timber creating a contrast in finishes. Melamine is available in a large range of colours – samples available on request.

choose your handrail.

standard loop.

straight loop with return.

angled loop with return.

timber upright extension.

(90% sheen as standard)

timber.

At make me furniture we work with a range of timbers to create rolling ladder systems or static shelf library ladder designs. We source our timber as locally as possible and try to keep our sustainability ethos in mind when advising customers' of what is available.

Our standard timber used for library ladders is European Oak – this is down to its finish and colouring which makes it suitable for most interiors whether traditional or contemporary. We can also supply ladders in a sprayed finish, usually in a white satin, again as with all our services we can offer spraying in a range of colours and finishes.

The samples shown to the left are just a small selection of the timber available – these have been chosen on the popularity of customers requests...
